The task that the new Legislature should take up promptly and can deal with effectually, if it will, is that of saving New York from its threatener beginning with the smoke of soft coal furnaces.

It is not an extraordinary session of Congress which opens to-day. But it is a most important one. And if the Congressmen are real representatives of the people they will be prompt and businesslike in their proceedings.

In the discussion as to whether the new dance from Chicago's Midway Plaisance is indecent or not "The Evening World" is emphatically in favor of giving the benefit of the doubt to that decent sentiment which objects to such exhibitions.

The State law on corporations fixes the legal rate of dividends at 10 per cent. Yet in the New York Street-Cleaning Department, where \$142 horses figure in a big deal at \$250, there is the suggestion. at least, of something more than a 78 per cent. dividend. Is it too close corporation which is here involved to make a thoroughly open investigation

### THE FIFTY-THIRD CONGRESS.

Congress meets in regular session to day. It has before it more important duties than have devolved on the National Legislature since the period of reconstruction. It starts with the advantage of knowing that every great issue likely to come before it was fully understood by the people at the time it was elected, and was passed upon by the voters with no uncertain or hesitating voice. It knows the popular will. It was

#### AN UNFIT INVESTIGATOR.

Mr. C. G. F. Wahle is a Commissioner of Accounts. He draws a salary of five thousand dollars a year from the city and has no very laborious work to perform for it. In consequence of "The Evening World's" exposure of the fact that the Street-Cleaning Department under Commissioner Brennan's management purchased a number of horses at two hundred and fifty dolfars a head when they were offered to other persons at one hundred and twenty dolfars to to hundred and forty-five dolfars per head, Mr. Wahle has been set to work to examine the Brennan accounts.

The proof of official dishonesty seems to be as complete and conclusive as possible. It is admitted that the Department paid \$250 each for the horses all around. "The Evening World" is in possession of a written agreement of the parties from whom the purchases were made to supply any number of precisely similar horses to those furnished the city at \$120 to \$145 a head.

Commissioner Wahle enters upon the form for it. In consequence of "The Evening World's" exposure of the fact ing of any rejected manuscripts or pictures, of that the Street-Cleaning Department whatsoever character or value. No exceptions will under Commissioner Brennan's manage-

Commissioner Wahle enters upon the prosecution of this most important investigation with the impertment and suspicious remark that "the charges seem to him to be the work of horse dealers whom the Street-Cleaning Department did not patronize."

This indicates that he goes to his work with a disposition to find excuses for the apparent dishonesty. If there is any explanation to be made of the seeming wrong, if the witnesses have.
